

Arman Ahmed Taief

Department of Computer Science and Engineering
Bangladesh University of Business and Technology
Phone: +8801969135176 Email: armanahmedtaief@gmail.com

Objective

A dedicated and detail-oriented Computer Science undergraduate with three years of applied learning across core technical domains, including C, C++, Python, Data Structures and Algorithms (DSA), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks, System Analysis and Design (SAD), Object-Oriented Programming (OOP), and Machine Learning, along with foundational knowledge of Compiler Design and Microcontroller and Microprocessor systems. Enriched by hands-on exposure to software engineering projects spanning the complete development lifecycle—from design and implementation to testing and deployment—I am eager to leverage this strong theoretical foundation and practical skill set to contribute meaningfully to innovative, real-world software solutions, while continuing to grow as a proficient and adaptable software engineer.

Education

- **B.Sc. in Computer Science and Engineering** Running
CGPA: 3.40/4.0 (Current 7th Semester)
Bangladesh University Business and Technology (BUBT), Bangladesh
- **HSC** Jan 2021 – Dec 2022
Savar Labrotary Collage (SLC), Bangladesh
- **SSC** Jan 2019 – Dec 2020
Ebac Public School (EPS), Bangladesh

Professional Experience

- **Social Media Assistant, Holiday Inn Resorts** March 2020- Nov 2020
- **Sales Executive – Digital Marketing, Express Digital Systems LLC, Dubai, UAE**
Feb 2021 – march 2021

Skills

Coding: C, C++, Python, Java.

Database: MySQL.

Technical: Digital Marketing, Graphic Design, Canva Design.

Others: Codeblocks, VSCode, Android Studio, Pycharm, IntelliJ Idea, Anaconda , Jupyter Notebook, Goggle Collab, MS Word, MS Excel, Goggle Doc.

Project

- **CampusGo – University Campus Community Platform** *Flutter, Django REST Framework, MongoDB, Firebase*
Developed a cross-platform mobile application that unifies essential campus services, including a community feed, second-hand book marketplace, job board, hostel directory, tuition exchange, study groups, direct messaging, and notifications. Implemented a secure Django REST API with Firebase Authentication and server-side authorization, using MongoDB with PyMongo for data management. Designed a layered backend architecture (DTO, Service, Repository, Controller) to improve security, maintainability, and scalability.
- **SDP100 – Student Management System** *C++, File Handling (fstream), Structs, Arrays*
Developed a complete student record management system using C++ without external libraries. Built secure authentication with registration/login and password masking. Implemented CRUD operations with file I/O for persistent data storage in CSV format. Created search functionality by ID and blood group with proper input validation. Designed a user-friendly console interface with centered menus and confirmation dialogs.
- **SDP200 – Student Result Analysis** *Python, Tkinter, MySQL, Matplotlib, Seaborn*
Developed a desktop application using Python Tkinter for GUI and MySQL for database management, integrated with ML models (Linear Regression, Decision Tree Classifier) to predict student final marks and grades based on midterm scores, evaluations, and attendance. Designed interactive dashboards with 8+ visualization types (KDE plots, heatmaps, scatter plots) and real-time student profiling for performance and attendance analysis, backed by a MySQL database for persistent storage.

Certification Courses

- Digital marketing (SR Dream It)
- Data Analysis Python (BUBT-TAFE)
- Selected SDP Project Showcasing And Idea Pitching (BASIS of BUBT Chapter Club)
- Graphic Design (SR Dream It)
- Problem Solving (Basic) – HackerRank

Leadership Skills

- Sports Volunteer (Ebac Public School)
- Project Management
- Team Manager

Language

- English
- Hindi
- Bangla
